SUMMARY

Experienced team lead with a strong background in operations management, training, and client communication, bringing leadership and problem-solving skills to collaborative software development environments. Recently completed LaunchCode's Software Development program, gaining hands-on experience with Java, JavaScript, React, Spring Boot, and MySQL through building a full-stack capstone project that tracks ecological data. Excited to apply both technical and interpersonal strengths in a role that values innovation, continuous learning, and real-world impact through technology.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript, | React, Spring Boot | MySQL Workbench

EXPERIENCE

Eye On The Fly — LaunchCode Capstone Project

- Eye On The Fly is my Capstone Project designed to track sightings of the Spotted Lantern Fly, an invasive insect species spreading in the United States.
- Developed a submission form for sightings to be entered and subsequently tracked.
- Designed County objects to reflect the amount of sightings with color variation based on number of sightings per county.
- Built a navigation bar to move throughout different features of the project.
- Full Project Tech Stack: Java, JavaScript, HTML, CSS, Git, VS Code, React, Spring Boot, MySQL Workbench

Pet Boarding and Daycare Lead — Canine Social of Troy and Kennelwood Pet Resorts

July 2023 - Present

- Managing a team through building operations and standards of care.
- Training new employees on company SOPs as well as client communication and data logs.
- Marketing research through online engagement analytics.
- Opening and closing the facility.

Shipping and Inventory Manager — The Goodz Inc.

October 2021 - April 2023

- Curated inventory reports for tracking sales and what to order for restocking.
- Trained new employees on company SOPs.
- Managed teams through restocking shipment deliveries at the facility.
- Opened and closed the on site store front.
